WHO-Symposium

Recent Advances in Pathology and Genetics of Tumors of the Urinary System and Male Genital Organs

Saturday, March 14, 2015, 09.00 h
Hörsaal NORD 1, UniversityHospital Zurich
Dear Colleagues,

New signaling pathways and molecular targets for diagnosis and therapy are constantly discovered in urological tumors. It is necessary to incorporate new developments into the daily practice in areas such as genetics, cell biology and epidemiology which influence cancer diagnosis and treatment. This is a challenge for cancer researchers, pathologists and urologists.

We cordially welcome you to this one day symposium which summarizes recent progress in the pathology and genetics of urological tumours. The symposium is part of our lecture series «150 Years Pathology Zurich». We were able to invite leading scientists as speakers who participated in the preceding Editorial and Consensus Conference on the 4th edition of the WHO «Classification of Tumours of the Urinary System and Male Genital Organs».

We are looking forward to interesting lectures and stimulating discussions.

Dr. Hiroko Ohgaki
Series Editor
WHO Classification of Tumours Series
International Agency for Research on Cancer (IARC)

Dr. Holger Moch
Professor, Medical Director and Chairman
Institute of Surgical Pathology

Program Symposium
Saturday, March 14, 2015, 09.00 h, Hörsaal NORD 1, University Hospital Zurich

09.00 h
Registration and coffee

10.00 h
Endocrine disruption, testicular dysgenesis and germ cell cancer
Niels Skakkebaek

10.45 h
Biology and clinic of germ cell tumors; an integrative approach
Leendert Looijenga

11.30 h
Renal clear cell tumors that are NOT clear cell renal cell carcinoma: Some recent developments
Satish K. Tickoo

Lunch

13.00 h
High-grade distal nephron-related carcinomas of the kidney: Emerging spectrum based on evolving clinico-pathologic experience
Mahul B. Amin

13.45 h
Classification of urothelial cancer; morphological diversity, clinical and molecular correlates
Victor E. Reuter

Coffee

15.00 h
Molecular approaches to predict clinical behavior of bladder cancer
Lars Dyrskjot

15.45 h
New concepts in prostate cancer
Peter Humphrey

16.30 h
Utilizing structured pathology data from radical prostatectomies to drive quality improvement in urologic oncology practice
John R. Srigley
General Information

Speakers

**Dr. Niels Skakkebaek**
Department of Growth and Reproduction
University of Copenhagen
Copenhagen, Denmark

**Dr. Leendert Looijenga**
Department of Pathology
University Medical Center Rotterdam
Rotterdam, The Netherlands

**Dr. Satish K. Tickoo**
Department of Pathology
Memorial Sloan Kettering Cancer Center
New York, USA

**Dr. Mahul B. Amin**
Department of Pathology and Laboratory Medicine, Cedars Sinai Medical Center
Los Angeles, USA

**Dr. Victor E. Reuter**
Department of Pathology
Memorial Sloan Kettering Cancer Center
New York, USA

**Dr. Lars Dyrskjot**
Department of Molecular Medicine
Aarhus University Hospital
Aarhus, Denmark

**Dr. Peter Humphrey**
Department of Pathology
Yale University School of Medicine
New Haven, USA

**Dr. John R. Srigley**
Pathology and Molecular Medicine
McMaster University
Mississauga, Canada
